BASIC-ABSTRACT:

NOVELTY - The cover for such as mobile telephone (30) is produced in a flexible

leather material. The cover is in two parts (11). This has a decorative pattern on the outer surface and is fixed by a releasable adhesive to the surface of the telephone. An intermediate layer of foam is placed between the two parts.

USE - For mobile telephones and cameras.

ADVANTAGE - The cover is easy to fix and remove.

DESCRIPTION OF DRAWING(S) - The figure shows an exploded perspective view of the cover parts.
